

YASH BHARAMBE

Phone: +91-9922850034 Email: ybharambe591@gmail.com LinkedIn GitHub

Professional Profile

Information Technology undergraduate with strong interest in cybersecurity, secure system design, networking, and full-stack development. Experienced in Grey-Box Vulnerability Assessment and Penetration Testing (VAPT), web application security testing, and building interactive technical projects. Interested in research-driven work related to secure systems, network communication, and applied security.

Education

Bachelor of Engineering (B.E.) in Information Technology

P.E.S. Modern College of Engineering, Pune

2023 – 2027 (Expected)

CGPA: 8.08/10

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Cybersecurity Fundamentals

Technical Skills

- **Programming Languages:** C, C++, Java, Python, JavaScript
- **Web Technologies:** React.js, Node.js, Express.js, REST APIs
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Cybersecurity & Networking Tools:** Wireshark, Burp Suite, Nessus
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), TCP/IP, DNS, HTTP, Networking Fundamentals, Grey-Box VAPT Methodology
- **Operating Systems:** Windows, Linux (Ubuntu, Kali Linux)
- **Development Tools:** Docker, Git, GitHub, VS Code, Cursor

Experience

Cybersecurity Intern

scaleFULL Technologies LLP

Jan 2026 – Feb 2026

- Performed Grey-Box Vulnerability Assessment and Penetration Testing (VAPT) on web applications.
- Identified vulnerabilities including SQL Injection, Cross-Site Scripting (XSS), and security misconfigurations.
- Used Burp Suite, Nessus, and Wireshark for traffic analysis, scanning, and manual security testing.
- Assisted in documenting vulnerabilities with severity classification and remediation suggestions.

Projects

GitLearn – Interactive Git Learning Platform

- Developed an interactive web-based platform to help users learn and simulate Git commands visually.
- Implemented terminal-style command input and dynamic Git graph visualization for better conceptual understanding.
- Focused on improving beginner understanding of branching, commits, and repository workflow through sandbox-based practice.
- **Tech Stack:** React.js, Node.js

SQL Protection Tool

- Developed a static code analysis tool to identify potential SQL Injection vulnerabilities in source code.
- Built a rule-based detection system to flag unsafe query construction, dynamic SQL usage, and direct user input concatenation.

- Generated vulnerability reports with secure coding recommendations, including the use of parameterized queries and prepared statements.
- **Tech Stack:** Python, Static Code Analysis

Technical Interests

- Web Application Security
- Network Security
- Secure Backend System Design
- Penetration Testing
- Space Technology and Secure Communication Systems

Certifications

- Cybersecurity Internship Completion Certificate

Academic / Technical Activities

- Participated in cybersecurity internship involving Grey-Box VAPT and web application assessment.
- Worked on technical projects involving secure systems, Git workflow visualization, and SQL injection detection.
- Interested in student-level research and development related to secure communication systems and applied cybersecurity.
